

Brandon Tappan

Executive Vice President, ShiftKey

Brandon Tappan has been a licensed nursing facility administrator for more than 15 years. He holds active licenses in Colorado and Texas but spent the 12 years before joining ShiftKey leading large multi-facility/multi-state operations across the post-acute healthcare space. He progressed to the position of president of operations at Senior Care Centers during his tenure there and helped that organization grow to become the largest skilled nursing provider in Texas. He also has held executive leadership roles at Kindred and, most recently, Stonegate Senior Living. Brandon has participated in large acquisition growth, new construction and divestiture and is well-versed in the many impacts of shifting demographics and healthcare reform on the sector. In addition to Brandon's deep industry knowledge, he brings to ShiftKey a passion for leadership development and continuous improvement in service to its grand vision. Brandon has been a national legislative advocate in the post-acute space and within the states where he has operated. He served on the Texas Health Care Association Board of Directors for five years and was a senior examiner for the American Health Care Association/National Center for Assisted Living National Quality Award program.
